

Scandal surrounding a nearly €2 billion cogeneration tender: structures linked to Yevhen Korf and Andriy Teslenko have begun removing the digital traces of the scheme

Scandal surrounding a nearly €2 billion cogeneration tender: structures linked to Yevhen Korf and Andriy Teslenko have begun removing the digital traces of the scheme

After the publication of information about the tender of JSC «Kryvorizka Teprotsentral» for the construction of cogeneration plants and possible artificial narrowing of competition, individual mentions and materials related to the procurement participants and their connections in the energy sector began to disappear from the public space. In particular, this concerns publications about previous tenders, companies' participation in «Centerenergo» projects, and information about persons associated with lobbying decisions in the field of state energy.

In turn, we publish materials that are being pushed out of the information field. This is not only about one tender in Kryvyi Rih, but about a broader problem of transparency in energy procurement during the war.

The second [heating season](#) is passing, as [in Kryvyi Rih](#) they still cannot decide who will install the new cogeneration plant at the local heat plant. For almost a year, the procurement procedure was announced, changed, and canceled. And only on the fourth attempt at the end of 2025, the tender was finally [held](#) – with a winning price of 1.776 billion UAH.

The customer is JSC «Kryvorizka Teprotsentral» – an enterprise under the management of NJSC «Naftogaz of Ukraine». After the last announcement of the procedure in October last year, a potential participant – LLC «ENERGO-SERVICE COMPANY «METROPOLIA»» – filed a [complaint](#) to the Antimonopoly Committee, stating discriminatory requirements and artificial narrowing of competition.

According to calculations, the result of the tender was the determination of a winner whose offer exceeded the initial most economically advantageous offer by 206.4 million UAH.

A year of relaunches

The history of this procurement began back in February 2025. Then the expected cost was about 1.585 billion UAH. 11 companies participated in the auction, and the lowest offer was 1.182 billion UAH – almost 400 million less than the expected cost. Despite real competition and a significant price reduction, no winner was determined at that time, and the tender was canceled.

In July, the procurement was repeated in the format of a commercial line item without
